## Request for Cooperation in the Management and Regulatory Compliance Promotion of Honeycomb Products for Export to Korea

To whom it may concern,

I would like to express our sincere appreciation for your interest and cooperation in facilitating the smooth food trade with the Republic of Korea.

In order to ensure that food products exported to Korea comply with the Korean Food Code, I am providing the relevant regulatory information below. I kindly request your cooperation in informing honeycomb exporters in your country and managing their honeycomb products accordingly.

According to the Korean Food Code, **Honeys** must not contain other foods or food additives during the manufacturing or processing stages. Honey products may be manufactured or processed using either natural honeycomb produced by bees or artificially produced foundation<sup>1)</sup>. However in the case of honeycomb products<sup>2)</sup>, since there is a possibility that the foundation may be directly consumed, only **natural honeycomb made by bees is permitted; the artificially produced foundation should not contain in honeycomb products.**

---

1) **Foundation** refers to an artificial layer inside the frame where bees create wax cells (comb), and may be stamped or imprinted with a hexagonal pattern, which allows bees to build straight combs.

2) **Honeycomb products** : Honeycomb honey, Sugar-fed honeycomb honey

## Honeys

### ○ Manufacturing / Processing Standards

Other food or food additives shall not be added, such as pollen, royal jelly, sugars or sweeteners.

### ○ Food Type

#### (1) Honeycomb honey

It refers to a natural product, such as nectar and sap, etc., collected and stored by honey bees into honeycombs, the entire or part of which is subsequently sealed; or such natural product added with honey, which maintains the original shape of honeycombs.

#### (2) Honey

It refers to a natural product, such as nectar and sap, etc., collected and stored into honeycombs by honey bees, and extracted and ripened subsequently.

#### (3) Sugar-fed honeycomb honey

It refers to honeycomb honey obtained from bees fed with sugar; or added with honey or sugar-fed honey thereto, which maintains the original shape of honeycombs.

#### (4) Sugar-fed honey

It refers to a product obtained from bees fed with sugar, extracted and ripened subsequently.

I once again express our sincere appreciation for the continued cooperation of your country and if you have any questions or concerns, please feel free to contact us.

Sincerely

*Son, Young-wook*
